

ICHIC 2014 Program

3-July (Thursday)			
Time	No	Speaker (Country)	Title
8:30-9:10	Registration		
9:10-9:30	Opening		
Session 1	Chaired by A. Togni		
9:30-10:00	IL-1	Y. Kita (Japan)	Metal-Free Oxidative Coupling Reactions
10:00-10:30	IL-2	K. Muniz (Spain)	Iodine(III) Reagents for the Intermolecular Difunctionalization of Alkenes
10:30-11:00	IL-3	S. Canesi (Canada)	Oxidative cascades promoted by a hypervalent iodine reagent and applications in total synthesis
11:00-11:30	Coffee Break		
Session 2	Chaired by K. Muniz		
11:30-11:50	OC-1	W. J. Moran (UK)	A study of alkynyl(aryl)iodonium salts' syntheses, stabilities and reactivities
11:50-12:10	OC-2	M. Uyanik (Japan)	Hypervalent Organoiodine Catalysis for Enantioselective Oxidative Dearomatization of Phenols
12:10-13:30	Lunch		
13:30-15:00	Poster Session & Exhibition		
Session 3	Chaired by Y. Kita		
15:00-15:30	IL-4	T. Wirth (UK)	New Opportunities for Hypervalent Iodine Reagents
15:30-16:00	IL-5	S. Quideau (France)	Asymmetric Hydroxylative Phenol Dearomatization Reactions using Chiral Iodanes
Session 4	Chaired by T. Wirth		
16:10-16:30	OC-3	A. Yoshimura (USA)	Hypervalent Iodine Mediated Catalytic Cycloaddition of Aldoximes with Alkenes and Alkynes
16:30-16:50	OC-4	J. Malmgren (Sweden)	C2-Selective Arylation of Indoles using Heterogeneous Nanopalladium Catalysis and Hypervalent Iodine
16:50-17:10	OC-5	B. J. Nachtsheim (Germany)	Alkynyliodonium Salt Mediated Alkynylation of Azlactones –A Fast Access to β,γ -Alkynyl α -Amino Acids
Session 5	Chaired by S. Quideau		
17:20-17:50	IL-6	J. D. Protasiewicz (USA)	Hypervalent iodine compounds for transition metal catalyzed oxidation reactions
17:50-18:20	IL-7	K. Ishihara (Japan)	Asymmetric Iodine(I or III) Catalyses
